

Fence / Satellite Dish Dig Permit

Residents that want to do improvements to their residence i.e. fences, sheds, antennas, satellite dishes, must first fill out the Campbell Crossing Fence/Satellite Dish Digging Permit, include a sketch showing locations and boundary limits of proposed improvement.

In cases where you have to dig in your yard to install the improvement, the telephone company must be notified and their representative must identify the location of any buried cable and sign the Campbell Crossing Fence/Satellite Dish Digging Permit. It is imperative that when installing fences, satellite dishes, or antennas, this procedure must be followed to relieve the resident of any liability in connection with damaging buried cable.

Return the Campbell Crossing Fence/Satellite Dish Digging Permit to your community office with the estimated date of completion of the improvement and Campbell Crossing will inspect within seven days after that estimated date. Originals will be filed in your personal resident record.

Satellite dishes shall not be attached to any part of your residence. Satellite dishes will be placed on poles in the back yard.

Fences

Residents requesting to install a new fence or an extension to an existing fence must submit a completed Campbell Crossing Dig Permit to their community office. Fences will be of a standard design and aligned at the rear of the house. Approval of a request is contingent upon full compliance with the following provisions:

- a. The fenced area will be located totally at the rear of the assigned home, not to go beyond the back corner of the home or extend more than 35 feet behind back edge of home.
- b. Fences may not be connected to the patio divider or any part of the home.
- c. Fencing will only be chain link without inserts or privacy fencing, see note below regarding Cole Park fencing requirements. The chain link will be 4 feet in height unless existing fencing is at a different height 4 feet, in which case the fence extension will be of the same height as the existing fence.
- d. Only corner posts may be secured in concrete but they will not extend more than 4 inches above the height of the chain link fencing and must have post caps attached. Posts are to be spaced no more than 10 feet apart.
- e. The chain link will be properly stretched and secured to the fence posts and maintain a uniform height.
- f. Gates will be constructed commercially from the same materials as the fence and kept in serviceable condition at all times.
- g. No outside bracing or guy wires will be used.
- h. Fences will maintain a professionally installed appearance at all times. Components will be replaced if they become broken, corroded, or damaged.
- i. In areas where residents have installed a fence, the resident is required to remove portions of fencing to allow necessary equipment in the backyard to provide required repairs. It is advisable to build a fence so one end of the fence and one post may be easily removed to allow equipment to access back yard if needed.
- j. All resident installed fences must be removed when moving out or not properly maintained. The only exception is when the future resident assumes responsibility for the existing fence by executing an assumption of responsibility memorandum.
- k. Decorative fencing in the front of the home is permissible as long as the fence does not exceed 18 inches in height and does not detract from the aesthetic view of the home.

Notes:

*Homes with established wooden privacy fencing will not be allowed to extend the fence.

**Fencing for Cole Park will be Black Vinyl Coated chain link and hardware only.

Improvement of Campbell Crossing Residences

Resident Name: _____ Date: _____

Residence Address: _____

Daytime Phone #: _____ Evening Phone #: _____

Request the following improvement(s) be inspected:
