

TRO ENERGY SOLUTIONS

Charging forward in electrification

Providing fast & convenient Level 2 electric vehicle (EV) charging!

FACTS ABOUT CHARGING ON POST

- TROES is your approved provider for Level 2 EV charging, including installation, testing and maintenance in on-post residences with 24/7 customer service available.
- Level 2 EV charging is safe, efficient, and much quicker than other charging alternatives- it can take on average 5-6 hours to reach a full vehicle charge.
- Due to the nature of Level 1 charging, it will no longer be allowable under the terms of a resident's lease and the Community Guidelines.

EASY TO SIGN UP - Scan, Register, Install & Charge!

1. Scan the QR code to register.
2. Select a ChargeTime plan that is right for you!
3. An electrification specialist will call to coordinate the installation process and scheduling.
4. Once the charger is installed, you can conveniently manage your usage, billing, scheduling and more through the ChargeTime app or by directly reaching out to TROES.
