| 105 CMR 410.000 requires the installation of water conservation devices prior to a dwelling unit becoming eligible for the imposition on tenants of a charge for water and/or sewer. The devices must meet the following specifications:  |                                     |                                |
| Showerheads with maximum flow rate not to exceed  | 2 ½ gallons per minute (2.5 gpm)    |                                |
| Faucets with maximum flow rate not to exceed  | 2 2/10 gallons per minute (2.2 gpm) |                                |
| Ultra-low flush water closets (toilets) not to exceed   | 1 6/10 gallons per flush (1.6 gpf)  |                                |
| The submetering equipment used to measure the quantity of water used for each dwelling unit and common area must meet the standards of accuracy and testing of the American Water Works Association or similar accredited association. A licensed plumber must install the water closets and submetering equipment. |                                     |                                |

I certify that (check all that apply):

I have installed the submetering equipment listed above in accordance with accepted plumbing standards.

I have installed one or more water closets not exceeding 1.6 gallons per flush.

Determined that existing water closets do not exceed 1.6 gallons per flush.

The plumbing permit issued by the city/town, if required, is attached.

Dwelling unit is connected directly to a meter installed by a water company and, in accordance with M.G.L. c. 186, § 22(p), does not require the installation of a submeter.

Signed under the pains and penalties of perjury, *William Lane*  
Signature of Licensed Plumber

| Property Owner Certification   |   |                       |
